Attention:

Enclosed are our Inspection Reports as mandated by OSHA Regulation 1910.179 for your  
 Hoists  Cranes  Monorails dated \_\_\_\_\_.

These reports reflect the conditions at the time of inspection. **CONDITIONS CAN CHANGE DRASTICALLY WITH A SINGLE MISUSE!** Therefore, your operators should be trained to visually inspect the equipment before they operate it. **If your operators are not properly trained or need to be updated, we would be glad to provide Overhead Crane Training.**

The training will include lecture, enhanced with videos, followed by a test to help you determine the level of competence of your operators.

**Please be advised that this Inspection made no evaluation of the Design, Engineering and Installation of your System.**

Please examine the reports carefully and note that items emphasized with color require your attention and action as follows:

<b>Red</b>	<b>DANGER</b>	Indicates an imminently hazardous situation which, if not corrected, will result in death or serious injury. This signal word is limited to the most extreme situations.
<b>Orange</b>	<b>WARNING</b>	Indicates a potentially hazardous situation which, if not corrected, could result in death or serious injury.
<b>Yellow</b>	<b>CAUTION</b>	Indicates a potentially hazardous situation which, if not corrected, may result in minor or moderate injury.
<b>Blue</b>	<b>NOTICE</b>	Indicates a potential situation which, if not corrected, could or will result in equipment damage.

Please contact the undersigned with any question or concerns you may have regarding these reports.

Truly yours,

---
